The Muhanad–Drug Discovery Digital Highway

Four Stations • One Vision • A Connected Future

Personal story → Community → Scientific discussion → Digital research

A connected initiative in which human experience inspires scientific questions, discussion encourages investigation, and research remains grounded in a meaningful human purpose.

1 The Four Stations

1. Muhanad Website — Personal Gateway

Purpose: Muhanad's personal story, family, memories, hopes, and future.
Visit: muhanad-delta.vercel.app

2. Muhanad Blog — Personal Stories and Updates

Purpose: A place for stories, updates, family experiences, and personal reflections.
Visit the Blog section: Muhanad Blog

3. Drug Discovery 2026 Blog — Scientific Discussion

Purpose: A forum for scientific ideas, research questions, and discussion of emerging approaches to vision restoration.
Visit: Drug Discovery 2026 Blog

4. Drug Discovery Vercel App — Digital Research Environment

Purpose: The application supports the digital side of the initiative and provides a place to explore research concepts.
Visit: Drug Discovery Application

The circular principle. The highway returns to Muhanad's website, reconnecting scientific discussion with the personal motivation behind the initiative.

PERSONAL STORY → COMMUNITY → SCIENTIFIC DISCUSSION → DIGITAL RESEARCH → PERSONAL STORY

2 The Essential Feature: Two-Way Communication

The four stations should work as one connected system:

- **Navigation:** Each station links to the other relevant stations, allowing visitors to move around the complete network.
- **Comments:** Visitors can respond to blog posts and participate in discussions wherever comments are enabled.
- **Scientific exchange:** Questions raised through personal stories can lead to wider scientific discussion.
- **Research continuity:** Scientific ideas can be explored further through the digital application.
- **Human purpose:** The initiative remains connected to Muhanad's story and the wider goal of advancing scientific understanding.

3 A Practical Distinction

Links between the four stations are established in parts of the system. To make discussion work reliably across the entire network, comments should be checked wherever they are intended to be available, and visitors should be able to move easily between the different discussion spaces.

Important: A link alone does not automatically synchronize comments between separate platforms. Comments posted on one service will not necessarily appear on another unless a dedicated integration is built and configured.

4 The Shared Vision

This is more than four separate websites. It is a connected initiative in which personal experience can inspire research questions, scientific discussion can encourage careful investigation, and digital tools can help organize and develop ideas.

All scientific possibilities discussed through this initiative remain subjects for rigorous research. They should not be presented as established treatments or as guaranteed outcomes.

One Story. Four Stations. A Shared Future.
